### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

### **DETAILED ACTION**

Applicant's Amendment filed 01/06/05 has been entered and carefully considered. Claim 1 has been amended. Claims 9-23 have been canceled. Claims 24-31 have been added. However, limitation of amended and new claims have not been found to be patentable over prior art of record; therefore, claims 1-8 and 24-31 are rejected under the same ground of rejection as set forth below. The Examiner have changed the rejection from 102(a) to 102 (be) due to typo errors in the previous office action.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 and 24-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Koppolu [US. 5,706,458].

As to claims 1 and 24, Koppolu discloses teaches a computer implemented method and corresponding apparatus for a unified user interface for an application comprising the steps/means for one or more component tables (commands that map to keystrokes, figure 1, 112, underlined W of WordPerfect Help, underlined T of Technical Microsoft Word), wherein each component table corresponds to a component of the application (the commands under Help menu corresponds to a component of the application); and a master table merged from the one or more

component tables, said master table comprising commands that map to keystrokes (figure 11, each menu table (1104, 1106) comprises a list of commands that map to keystrokes. Therefore, the merged menu list comprises a merged "commands that map to key strokes" list as well as the master table).

As to claims 2 and 25, Koppolu also discloses the master table including available command (figure 1, 112); and available command vectors for the application (figure 1, menu, toolbar that the place to contain the commands, a command vectors is a place a user can go to get a set of commands).

As to claims 3 and 26, Koppolu shows each component table including at least one command for the corresponding component (figure 1, Technical Support command that map to keystrokes).

As to claims 4 and 27, Koppolu also shows each command and command vector has a unique object identifier. It was inherent that each command "Technical Support" of the Word Processor and Graphic programs has a unique object identifier in order to get the desired "Technical Support" command when the user requests.

As to claims 5 and 28, Koppolu teaches each command and command vector having a flag specifying visibility. It was inherent that the "Technical Support " command is in Koopolu's system has a flag to let the user know the command enabling or disabling for user to use.

As to claims 6 and 29, Koppolu also discloses an additional component table and wherein the master table is merged from the at least one component table and the

Art Unit: 2179

additional component table (the master table merges container menus with sever menus, column 5, lines 1-24, figure 11, each menu table (1104, 1106) comprises a list of commands that map to keystrokes. Therefore, the merged menu list comprises a merged "commands that map to key strokes" list as well as the master table).

As to claims 7 and 30, Koppolu teaches a removed component table of the at least one component table corresponding to a removed component and wherein the master table is merged from the remaining component tables of the at least one component table. It was inherent that the master table merges only "commands that map to the keystrokes" tables when server menu table of "commands that map to the keystrokes" is removed from a list.

As to claims 8 and 31, Koppolu also teaches the master table including available commands ("Quick Preview", "WordPerfect Help", "Technical Support" and "About Microsoft Word"), menus and toolbars and the location of each available command (figure 1).

### **Response to Arguments**

Applicant argues that Koppolu is exclusively directed to a merging the menus of two applications and teaches nothing regarding non-menu commands, non-menu command vectors, toolbars, or keyboard commands. However, the Examiner respectfully disagrees because the reference teaches the master table comprising commands that map to keystrokes (figure 1, 112). These keystrokes

are non-menu commands. Therefore, Koppolu not only teaches menu command but also suggests commands that map to keystrokes.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
